

West Sussex County Council Secure Email Information

(February 2019)

West Sussex County Council have published Important Information About Their westsussex.gov.uk Email Addresses.

From 31 March 2019, standard westsussex.gov.uk email addresses will be configured to have the same security as the current westsussex.gcsx.gov.uk email service.

What will change?

- From 1 April any email sent or received from a westsussex.gov.uk address to or from another secure address, such as GCSx/GSI/CJSM/PNN/NHS.net will be considered secure. WSCC GCSx accounts will no longer be required.

What do I need to do before 31 March 2019

- The changes will be implemented automatically and will not affect your use of WSCC emails. WSCC staff members will no longer be able to send or receive emails from their GCSx accounts after this time.
- From this date all westsussex.gov.uk email addresses will be secured with TLS1.2 in line with the GOV.UK guidance. If you have any questions or concerns, please contact: information.security@westsussex.gov.uk
